

Patient CRUD Test Cases

Test Case ID	Scenario		Expected Result	Status
1	View patient list	Navigate to the Patient List page and confirm all existing patient records load from the API and render in the table.	Patient list page loads and displays all patient records.	Pass
2	Add a new patient	Fill out the Add Patient form with valid data for all required fields and submit it.	Patient is saved successfully and appears in the patient list.	Pass
3	Edit an existing patient	Open an existing patient record, change one or more fields, and save the update.	Updated patient information is saved and displayed correctly.	Pass
4	Delete a patient	Select an existing patient and confirm the delete action.	Selected patient is removed from the patient list.	Pass
5	Submit Add Patient form with missing required fields	Leave one or more required fields blank on the Add Patient form and attempt to submit.	Browser displays required field validation and prevents form submission.	Pass
6	View patient detail (full profile)	From the patient list, open a single patient's detail view to see their complete profile.	Patient detail page loads and displays the full profile: first name, last name, age, gender, phone number, and email.	Pass
7	Search patient list by name or phone	Type a partial first name, last name, or phone number into the search box on the Patient List page.	Patient list updates to show only records matching the search term.	Pass
8	Paginate patient list - Next page	On the Patient List page, click the Next button when more than one page of results exists.	The list advances to the next page of patients and the page number label updates.	Pass

9	Paginate patient list - Previous page	From page 2 or later, click the Previous button.	The list returns to the prior page of patients and the page number label updates. Previous is disabled/no-op on page 1.	Pass
